

Life is the priority / Life prevails.....

Why this course ?

Every surgeon, regardless of their specialty background, must be trained to manage polytrauma patients to save lives

Learning objectives/Highlights of course -

1. Case scenario based interactive discussion cum workshop on salient yet relatively untouched aspects of traumatology - ATLS guidelines
2. Hands on practice (needle,surgical cricothyroidotomy and intercostals drainage tube placement) on life like mannequins that give exact feeling of real operative scenarios
3. Course emphasizes a systemic approach to trauma care, prioritizing rapid assessment and resuscitation of injured patients - ATLS guidelines
4. Participants will be engaged in decision making / triaging in mass casualty scenarios.
5. Chest X ray interpretation - Identify life threatening injuries
6. Stop the bleed protocol – discussion and practice
